

HM CONNECTOR

Wire-to-wire connectors - Matable with HR receptacles

Features

- **Both crimp style and insulation displacement receptacles can be used**

Both crimp style and insulation displacement HR connector receptacles can be accommodated by the HM connector.

- **Housing-to-terminal locks**

Spring action housing-to-terminal locks are an inherent part of the housing, and assure smooth contact insertion and firm contact retention yet with low insertion force.

- **Mountable on a variety of panels**

Due to our unique panel installation locking mechanisms, the housing can be easily installed on panels of various thicknesses without using tools.

- **Highly reliable housing construction**

Since all of the contacts are individually and totally surrounded by housing walls, the contacts are protected from deformation from outside sources of stress or from mismatching. The polarized housing shape prevents reverse connection.

Specifications

- Current rating: Crimp style HR connectors type
3A AC, DC max.
Insulation displacement HR connectors type
2A AC, DC max.
- Voltage rating: 250V AC, DC max. (See Note below.)
- Temperature range: -25°C to +85°C
(including temperature rise in applying electrical current)
- Contact resistance: Initial value/10m Ω max.
After environmental testing/20m Ω max.
- Insulation resistance: 500M Ω min.
- Withstanding voltage: 1,000V AC/minute
- Applicable wire: AWG #26 to #22
0.13 to 0.33mm²
- Applicable panel thickness: 0.8 to 1.6mm (.031" to .063")

Note: Contacts are exposed at the housing lances.

Care should be taken so that these parts do not touch the metal section of the chassis.

- * Contact JST if Lead-Free product is required.
- * Refer to "General Instruction and Notice when using Terminals and Connectors" at the end of this catalog.

- Note:
1. Punch holes in the panel according to the sketch and table shown above. Burrs must be removed.
 2. The strength of the panel must be considered when punching two or more holes.
 3. The connector must be inserted from the same side as the hole is punched.
