For 6V operation use Digikey PN: MT7140-ND or the following Radio Shack transformer part numbers:

- 6VDC Transformer PN from Radio shack 273-1667 (3-12VDC/800mA Regulated AC-to-DC Adapter).

- Adaptaplug from Radio shack is also required: PN 273-1716 (Adaptaplug M, 2.1mm x 5.5mm)

No board modification is necessary for 6V operation.

## **Rework to use 5V Power Supplies with 3DK2166**

1. Install a jumper on J18

2. Install a 0 ohm resistor or a jumper across R131 on backside of board.

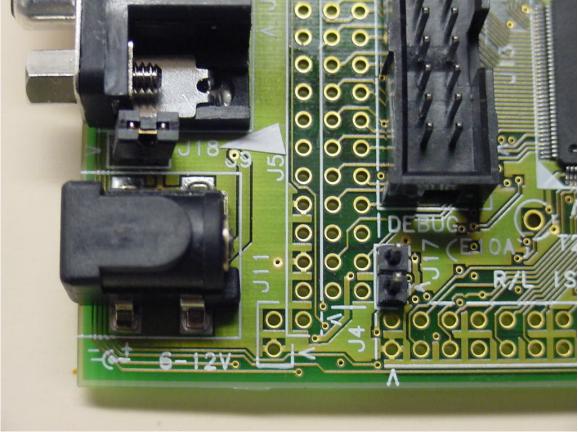

For 5V operation use:

- RTA standard 5V eval kit power supply PN: USBAG-PSU1.

or

- Digikey PN: DPD050055-Z5P-TC
