# PVC Foam Hea

# **Classic**<sup>™</sup>

After 27 years of consistent, reliable performance, Classic earplugs continue to be the preferred option for the majority of users. This is the No.1 hearing protector in the world. Made from a soft slow recovery polymer foam, it allows the user to roll the plug down for easy insertion into the ear canal and then expand slowly to form a comfortable seal against noise. Also available in 5-pair pack and as a refill option in the E·A·R One Touch dispenser.

The Classic Small was developed for users who are looking for all the benefits of the Classic but who want greater comfort in small ear canals. Has many of the features and benefits of the standard Classic.

#### Features & Benefits Include:

- · Excellent consistent attenuation
- · All day comfort
- · Fits most ear canals
- · Non-irritating
- · Water resistant
- · 100% recyclable
- Corded version ideal for use in food manufacture and process industries
- · Suitable for use with other PPE
- · Pillowpack provides re-usable storage case
- · Tested to EN352-2

# ring Protection

A·R Classic perFit 33

The SuperFit is the only earplug with the patented orange 'Fitting Ring' to easily see that the earplug is fitted properly. When no orange is visible, the best fit is achieved. Superfit 33 and 36 are new twists on the most popular earplug ever! SuperFit 33 is smaller in diameter and height than SuperFit 36 to fit those with smaller earcanals or those looking for lower attenuation. This new design introduces brighter colours, and a new formula for increased softness, comfort and performance. These products are made from low pressured foam to provide all day comfort and a secure fit in a wide range of ear canal sizes.
