

ICs for use with Crystal Oscillators

■ GENERAL DESCRIPTION

The XC2164 series are high frequency, low current consumption CMOS ICs with built-in crystal oscillator and divider circuits. For fundamental oscillation, output is selectable from any one of the following values for f_0 : $f_0/1$, $f_0/2$, $f_0/4$, and $f_0/8$. With oscillation capacitors and a feedback resistor built-in, it is possible to configure a stable fundamental oscillator or 3rd overtone oscillator using only an external crystal. Also the series has stand-by function built-in and the type, which suspends the oscillation completely (XC2164A~D type) or the type suspends only an output (XC2164K~N type) are available. The XC2164 series are integrated into SOT-26 packages. The series is also available in chip form.

■ APPLICATIONS

- Crystal oscillation modules
- Clocks for micro computer, DSPs
- Communication equipment
- Various system clocks

■ FEATURES

Oscillation Frequency	: 4MHz ~ 30MHz (Fundamental) 20MHz ~ 125MHz (3rd Overtone)
Divider Ratio	: Selectable from $f_0/1$, $f_0/2$, $f_0/4$, $f_0/8$ ($f_0/2$, $f_0/4$, $f_0/8$ are fundamental only)
Output	: 3-State
Operating Voltage Range	: $3.3V \pm 10\%$, $5.0V \pm 10\%$
Low Power Consumption	: Stand-by function included Selectable from Chip Enable type and Output Enable type

CMOS

Built-in Oscillation Feedback Resistor

Built-in Oscillation Capacitors C_g , C_d

Packages : SOT-26, Chip Form (1.3x0.8mm)

Environmentally Friendly : EU RoHS Compliant, Pb Free

■ PIN CONFIGURATION

■ PIN ASSIGNMENT

PIN NUMBER	PIN NAME	FUNCTION
1	Q_0	Clock Output
2	V_{SS}	Ground
3	$/XT$	Crystal Oscillator Connection (Output)
4	XT	Crystal Oscillator Connection (Input)
5	V_{DD}	Power Supply
6	$/INH$	Stand-by Control*

*Stand-by control pin has a pull-up resistor built-in.

unit [μm]

■ $/INH$, Q_0 PIN FUNCTION

$/INH$	Q_0
“H” or OPEN	Clock Output
“L”	High impedance

H = High level

L = Low level

■ PAD LAYOUT FOR CHIP FORM

Size (Chip) : 1.3x0.8mm
 Thickness (Chip) : XC2164xx1xxT : 280±20 μm
 : XC2164xx1xxF : 200±20 μm
 Backside (Chip) : V_{DD} Level
 Aperture (Pad) : 100x100 μm

■ PAD DIMENSIONS

PIN NUMBER	PIN NAME	PAD DIMENSIONS	
		X	Y
1	Q ₀	514	- 264
2	V _{SS}	222	- 264
3	/ XT	- 450	- 264
4	XT	- 450	264
5	V _{DD}	514	27
6	/ INH	47	264

unit [μm]

■ PRODUCT CLASSIFICATION

● Ordering Information

XC2164 ①②③④⑤⑥-⑦^(*)

DESIGNATOR	DESCRIPTION	SYMBOL	DESCRIPTION
①	Divider Ratio & /INH Pin Function	A	Chip Enable: f0/1

2. We assume no responsibility for any infringement of patents, patent rights, or other rights arising from the use of any information and circuitry in this datasheet.
3. Please ensure suitable shipping controls (including fail-safe designs and aging protection) are in force for equipment employing products listed in this datasheet.
4. The products in this datasheet are not developed, designed, or approved for use with such equipment whose failure of malfunction can be reasonably expected to directly endanger the life of, or cause significant injury to, the user.
(e.g. Atomic energy; aerospace; transport; combustion and associated safety equipment thereof.)
5. Please use the products listed in this datasheet within the specified ranges.
Should you wish to use the products under conditions exceeding the specifications, please consult us or our representatives.
6. We assume no responsibility for damage or loss due to abnormal use.
7. All rights reserved. No part of this datasheet may be copied or reproduced without the prior permission of TOREX SEMICONDUCTOR LTD.
